EXPERIENCE

Forestry and Woodland Management

Experience in many areas of woodland management, from woodland design, creation and maintenance. Practical woodland management experience including coppicing, thinning, felling and strimming. A full understanding and familiarity of current Forestry Commission grant funding schemes.

Ecology and Conservation

Experience in carrying out Phase 1 habitat surveys, desk studies and NVC classification. Experience of surveying rare and threatened species (bats, reptiles and amphibians).

Farming and Game & Wildlife Management

Experienced in modern farming practices e.g. combining cultivating, ploughing, drilling and moleing. Experience in preparing farm environmental records, plans and applications for current stewardship schemes (Higher Level Stewardship and Entry Level Stewardship).

Experienced in gamekeeping with knowledge of rearing pheasant and partridge poult, release pen building, habitat management, predator and vermin control, feeding pheasants and partridges, grass cutting and tractor driving.

Experience of project management and delivery of a deer management plan for a 400ha site to inform management and support Forestry Commission funding applications. Assisted the Forestry Commission with the capture of fallow and muntjac deer for research purposes.

Environmental/Pest and Vermin Control

Surveying domestic, commercial and industrial premises for rodent, insect and bird infestations. Experienced with handling rodenticides, pesticides and carrying out C.C.T.V drainage investigation works. Experienced with controlling birds within airfields to prevent bird strikes. Written reports for private clients and local district councils.
