

## CARTOGRAPHY E-BRIEF

Summer 2011

**LOCKHART  
GARRATT**  
TREES • WOODLAND • FORESTRY

Welcome to Lockhart Garratt's second Cartography e-brief, keeping you up to date with all news and developments in the Cartography service area.

## BESPOKE MAPPING SUPPORT

At Lockhart Garratt, we pride ourselves in complimenting the work we do with clear, concise maps to aid the communication of information. We are now able to offer this service to other companies and in fact we are already providing cartographic assistance to a number of companies including Savills, Samuel Rose, Isis Forestry Ltd, Liz Sharkey Forestry and Davies & Co.

For some companies it is not always viable to invest in the necessary software, equipment and skilled staff required for digital cartography and GIS, which is where Lockhart Garratt are able to assist. Using the latest GIS and graphic design software, our fully trained staff are able to offer a variety of map-based services at competitive prices. We can provide clear and concise maps for grant applications, sales particulars and IACS claims, as well as calculating areas and lengths and carrying out GIS analysis.

Our recently prepared brochure which details the full range of cartographic services is available to download [here](#).

## HOT TOPIC

Software and Technology

At Lockhart Garratt we are always reviewing the latest software and technology to aid and improve our services to clients, which is why we have recently invested in iPad's to aid field data collection. iPads are a lightweight, robust way of carrying digital map data into the field and sending it back to the office. With the addition of capturing digital field notes and the use of GPS, the data collected is more accurate, processed much quicker and interacts with our systems back in the office, so that data can be streamed back and forth between office-based Cartographers and in-field Consultants.

Lockhart Garratt are always committed to retaining and improving the level of accuracy and detail that

clients have come to expect.

The background of the top section features a stylized map with various road signs. A yellow sign with a black border is on the left. Two circular signs are visible: one with '0006' and 'D 58' and another with '0011' and 'D 65'.

## CASE STUDY

Producing Forestry Commission approved maps for grant funding & consent applications

The Forestry Commission's mechanism for providing financial support for woodland management in England is through the English Woodland Grant Scheme (EWGS).

Clear, accurate maps are a critical part of the application process detailing the operations to be undertaken and their geographical location.

At Lockhart Garratt, our highly regarded maps are produced using the latest version of ESRI's ArcGIS 10 software to deliver cost-effective, accurate maps in line with Forestry Commission guidance.
